Full guide - BuyFag Guide

Animal testing, also known as animal experimentation, animal research and in vivo testing, is the use of non-human animals in experiments that seek to control the variables that affect the behavior or biological system under study. This approach can be contrasted with field studies in which animals are observed in their natural environments or habitats.

Chernobyl effects on humans, animals and nature in area

The NEETs at /jp/ have created a guide for purchasing adult toys, take advantage of it. Look for /jp/'s Eternal Onahole thread if you have any questions not answered in the guide and also to discuss onaholes in general. Do not ask for recommendations, there is a section on their guide to avoid this. Doujin works
