container decreases, the pressure inside the container increases. By Jesslyn Shields Physical Science / Matter Why Are Air-dried Towels So Stiff?

Mass and volume exercise - Liveworksheets

A tube, often also referred to as a pipe, is a hollow cylinder that is often used to transfer fluids or gas. Calculating the volume

Read Free Science Matters Volume A Work Answers

of a tube essentially involves the same formula as a cylinder ($\text{volume} = \pi r^2 h$), except that in this case the diameter is used rather than the radius, and length is used rather than height. The formula therefore involves measuring the diameters of the inner and outer cylinder, as shown in the figure above, calculating each of their volumes, and subtracting the ...
