This switching logic keeps traffic isolated  
to only those Ethernet cables, or  
segments, needed to receive the frame

## Read Online Switching And Traffic Theory For Integrated Broadband Networks The

from the sender and transmit that frame to the destination device. This prevents the flow of unnecessary traffic on other segments of the network system, which is a major advantage of a switch. This is in contrast to the early ...

**Switching and traffic theory for integrated broadband ...**

## Read Online Switching And Traffic Theory For Integrated Broadband Networks The

Network hubs do not manage any traffic coming through them; they only broadcast — or repeat — packets from an incoming port to all other ports.

Function of a Switch vs. a Router. A router is a more sophisticated device than a switch. Traditional routers are designed to join multiple area networks (LANs and WANs). Routers serve as ...
