Michael Shermer with Dr. Arthur Benjamin — The Magic of Math: Solving for x and Figuring Out Why

He also brings the magic of mathematics to high school students by teaching a distance learning course on number theory and cryptography. The course, in its second year, was developed to give high school students who have completed Tech's Distance Calculus sequence a way to continue their math education with Tech.

Math and Magic - thegreatcourses.com

Presumably because he also loves magic and has learned tricks of the trade, the author compares the workings of math to magic. This is misleading because, as he well acknowledges, math is based on logic and proofs—not magic at all. Benjamin does a fine job of explaining the variety of proofs that math uses (by contradiction, induction, etc.).
