The Psychology Of Personality Viewpoints

Freud's own viewpoints on homosexuality varied, at times expressing biological explanations and at other times social or psychological explanations for sexual preferences. Unlike many thinkers of his time, Freud was unconvinced that homosexuality represented a pathology.

Freud's 5 Stages of Psychosexual Development

Altruism is the principle and moral practice of concern for happiness of other human beings or other animals, resulting in a quality of life both material and spiritual. It is a traditional virtue in many cultures and a core aspect of various religious traditions and secular worldviews, though the concept of "others" toward whom concern should be directed can vary among cultures and religions.

Altruism - Wikipedia

Positive leadership is an area of study within positive psychology concerning leadership styles, techniques, and behavior that can be classified as deviant—positively deviant. Being positively deviant means that the style, technique, or behavior the leader engages falls outside of the normal range observed in leadership.

Positive Leadership: 30 Must-Have Traits and Skills

How does the physical brain create the mind? This session explores how the brain's structure relates to specific mental functions. The cases of some famous patients, such as Phineas Gage and Patient H.M., demonstrate key points about the brain basis of personality and memory.
