The Science and Practice of Resilience | GGSC

Influence: Science and Practice is a psychology book examining the key ways people can be influenced by "Compliance Professionals". The book's author is Robert B. Cialdini, Professor of Psychology at Arizona State University. The key premise of the book is that in a complex world where people are overloaded with more information than they can deal with, people fall back on a decision making approach based on generalizations. These generalizations develop because they allow people to usually act

Science and Engineering Practices - NGSS Hub

As a science, it is concerned with the structuring and representation of biomedical knowledge and models of information processing in human beings and computers. 1 Practice in medical informatics focuses on the design and implementation of systems and tools that facilitate the delivery of health care and can be used to train health care practitioners as well as support biomedical research.
