Structures Outside the Cell Wall. Bacteria can also have structures outside of the cell wall, often bound to the cell wall and/or cell membrane. The building blocks for these structures are typically made within the cell and then secreted past the cell membrane and cell wall, to be assembled on the outside of the cell. Fimbriae (sing. fimbria)

Bacteria: Surface Structures - General Microbiology

A dissipative system is a thermodynamically open system which is operating out of, and often far from, thermodynamic equilibrium in an environment with which it exchanges energy and matter. A tornado may be thought of as a dissipative system. Dissipative systems stand in contrast to conservative systems.. A dissipative structure is a dissipative system that has a dynamical regime that is in ...
