Science Explains How Law Of Attraction Works - Human Brain And Quantum Physics HD

In the New Thought philosophy, the Law of Attraction is the belief that positive or negative thoughts bring positive or negative experiences into a person's life. [1] [2] The belief is based on the ideas that people and their thoughts are made from "pure energy", and that a process of like energy attracting like energy exists through which a person can improve their health, wealth, and personal relationships.

The Four Types of Attraction | Psychology Today

While there is something of a science to the romantic and sexual partners we choose, at the end of the day, attraction is still completely unique to each of our individual makeups and preferences. Anthropologist Helen Fisher, who has studied love and dating extensively, explains that we each have individual "love maps" that determine who we gravitate towards.
