Show that the language associated with ( r1+ r2)r3 is the same as the language associated with r1r3 + r2r3. Show that r1 (r2 + r3) is equivalent to r1r2 + r2r3. This will be the same as proving a “distributive law” for regular expressions.

In my opinion, the best book to understand the basics of Theory of Computation is "Introduction to Computer Theory" by Daniel I.A. Cohen. The best part of this book is that even though it covers the underlying theoretical concepts, the mathematical treatment is kept minimum for the readers of all levels to easily assimilate the concepts.
