Élément-trace métallique — Wikipédia

Mountaintop removal mining (MTR), also known as mountaintop mining (MTM), is a form of surface mining at the summit or summit ridge of a mountain. Coal

Access PDF Trace Elements Coal Vol 1

seams are extracted from a mountain by removing the land, or overburden, above the seams. This process is considered to be safer compared to underground mining because the coal seams are accessed from above instead of underground.

La notion d'éléments-traces métalliques, ou ETM tend à remplacer celle de métaux lourds [1] mal définie car englobant des métaux toxiques réellement lourds à d'autres (métalloïdes) l'étant moins. Tous les ETM sont toxiques ou toxiques au-delà d'un certain seuil et certains sont radioactifs (radionucléides).Leurs concentrations
