2.1 Relative Motion, Distance, and Displacement - OpenStax

Access PDF Unit 1 Answer Key

Motion Forces And Energy

In physics, motion is defined as the change in position with respect to time. In simpler words, motion refers to the movement of a body. Typically, motion can either be described as: Change in speed; Change in direction; The Force has different effects and here are some of them. Force can make a body that is at rest to move.
