Albendazole, also known as albendazolum, is a medication used for the treatment of a variety of parasitic worm infestations. It is useful for giardiasis, trichuriasis, filariasis, neurocysticercosis, hydatid disease, pinworm disease, and ascariasis, among other diseases. It is taken orally. Common side effects include nausea, abdominal pains, and headaches.

Beginner's guide to gastrointestinal surgery - Veterinary ...

Veterinary prescription drugs are those drugs restricted by federal law to use by or on the order of a licensed veterinarian [Section 503(f) Food, Drug, and Cosmetic Act]. The law requires that the drug sponsor label such drugs with the statement: "Caution: Federal law restricts this drug to use by or on the order of a licensed veterinarian."

Veterinary Drug Guide

Gastrointestinal surgery is commonly performed in both first opinion and referral practices. There are a number of common indications for gastrointestinal surgery including neoplasia, mechanical obstruction (due to neoplasia, intussusception or a foreign body), abnormal positioning (eg gastric dilatation and volvulus) or failure of motility (eg megacolon). This article will focus on basic ...
