"Gazzaniga is one of the most brilliant experimental neuroscientists in the world." —Tom Wolfe "Gazzaniga stands as a giant among neuroscientists, for both the quality of his research and his ability to communicate it to a general public with infectious enthusiasm." —Robert Bazell,...

Who's In Charge?: Free Will and the Science of the Brain ...
Steve McAlister / The Image Bank/Getty Images. "In traditional philosophy, free will is the belief that human behavior is an expression of personal choice that is not determined by physical forces, fate or God," he reminds us. In this view, implicitly, it's possible to subtract away these external factors—"physical forces..."

Who's In Charge?: Free Will and the Science of the Brain ...
Michael Gazzaniga, one of the leading authorities on neurobiology, takes a break from writing thick college textbooks to put forth this enjoyable, accessible book about free will and the brain. Tackling the concept of free will may seem like a daunting task, but Gazzaniga navigates the topic by delving into what neuroscience tells us about...
